1. INTRODUCTION
The 4 in 1 digital multi- Multi-Function Environment Meter has been designed to combine the functions of Sound Level Meter, Light Meter, Humidity Meter, and Temperature Meter. It is an ideal Multi-Function Environment Meter Instrument with scores of practical applications for professional and home use.

The Sound Level function can be used to measure noise in factories, schools, offices, airports, home, etc., checking acoustics of studios, auditoriums and hi-fi installations.

The Light function is used to measure illuminance in the field. It is fully cosine corrected for the angular incidence of light. The light sensitive component used in the meter is a very Stable, long life silicon diode.

The Humidity/Temperature is for use a humidity/semiconductor sensor and K type thermocouple. This operations manual contains general information and specification

1. LCD display: 3 1/2 digits LCD display with units of Lux, x10 Lux, °C, %RH, dB, A, C, Lo, Hi and low battery "BAT" MAX HOLD, DATA HOLD indication.
2. Power Button: Selects meter's power ON or power OFF.
4. MAX HOLD: If you press the MAX button, the maximum reading will be held. Press once again the button, will release the hold and allow a further measurement.
5. DATA HOLD: The reading will be held when Data Hold button Switch is pressed. If the button Switch is pressed once again, will release the hold and allow a further measurement.
6. Function Switch: Selects measurement functions of Lux, Temperature, Humidity and Sound Level.
10. Temperature Terminal: Insert the temperature probe in this terminal.

5. OPERATING INSTRUCTION

Measuring Sound Level
1. Turn the function Switch to "dB" position.
2. Remove the meter and face the microphone to sound source in a horizontal position.
4. The A, C-weighting curve is nearly uniform over the frequency range form 30 to 10 KHz, thus giving an indication of overall Sound level.
5. The Fast response is suitable to measure shout bursts and peak values form sound source.
6. The sound level will be displayed.
7. Note: Strong wind (over 10m/sec.) striking the microphone can cause misreading for measurement in windy locations, a windscreen should be used in front of microphone.

Measuring Light
1. Turn the function Switch to select the "Lux"
2. Remove the detector and face the photo detector to light source in a horizontal position.
4. Read the illuminance nominal from the LCD display.
5. Over-range: If the instrument only display one "1" in the M.S.D. the input signal is too strong, and a higher range should be selected.
6. When the measurement is completed. Replace the photo detector from the light source.
7. Spectral sensitivity characteristic: To the detector, the applied photo diode with filters makes the spectral sensitivity characteristic almost meet C.I.E. (International Commission on Illumination) photopia curve V (λ) as the following chart described.

Measuring Humidity/Temperature
1. Humidity Measurement:
   ☐ Set the function Switch to "%RH" position.
   ☐ Then the display will show the humidity reading value (%RH) directly.
   ☐ When the tested environment humidity value changed. It need to a few minutes to get the stable "%RH" reading.

Warning:
Don't expose the humidity sensor to direct sunlight.
Don't touch or manipulate the humidity sensor.

2. Temperature Measurement:
   ☐ Set the function Switch to "TEMP"
   ☐ Press Select Button: Selects "0.1℃ or 1℃ and 0.1℃ or 1℃" range.
   ☐ Then the display will show the environment temperature reading value (℃/℃) directly.
   ☐ Insert the temperature probe into the K-type thermocouple socket.
Touch the end of the temperature sensor to the area or surface of the object to be measured. The display will show the temperature reading value (°C/°F) directly.

**Warning:**
When function switch on temperature "0.1°C or 1°C and 0.1°C or 1°C" range, Never attempt a voltage measurement with the test leads inserted into the K-type thermocouple socket. You might be injured or damage the meter.

6. **MAINTENANCE**

**Battery Replacement**
If the sign "BAT" appears on the LCD display, it indicates that the battery should be replaced. Open the battery case and replace the exhausted battery with new battery. (1 x 9V battery NEDA 1604, 6F22 or equivalent)
